SUMMARY

Frontend Developer with 4 years of experience specializing in React.js, Next.js, and TypeScript. Experienced in building responsive, scalable web applications, integrating REST APIs, and delivering 3D experiences using Three.js and React Three Fiber. Proficient in Material-UI, monorepo architecture (Turborepo), and third-party integrations such as Clover, SproutVideo, and Avaturn. Focused on writing clean, maintainable code and delivering high-quality user experiences.

EXPERIENCE

Frontend Developer 11/2025 – 08/2026

Vasana (Remote, Full-time)

- Built accessible, reliable frontend interfaces for a mental and behavioural health diagnostic platform using React.js and TypeScript.
- Contributed to feature development and UI improvements, and integrated diagnostic tools that support adaptive health solutions.

ReactJs Developer 01/2023 – Present

Tagline Infotech LLP, Surat (Full-time)

- Currently working on the company's own product, building and shipping frontend features with React.js and Next.js.
- Developed and maintained web applications using React.js, Next.js, Redux, and TypeScript.
- Handled client communication, requirement gathering, and technical solutioning, along with off-hours support for critical issues and releases.
- Worked closely with designers and product managers to build clean, responsive, and user-friendly UI.
- Integrated third-party APIs and libraries and ensured smooth frontend–backend communication.
- Used Next.js features (SSR, API routes) to improve performance, SEO, and scalability.
- Mentored a trainee developer, reviewed code, and maintained code quality using ESLint and Husky.
- Built and optimized advanced features including 3D experiences (Three.js / R3F) and efficient state management.

Javascript Developer 11/2022 – Present

Tagline Infotech LLP, Surat (Full-time)

- Worked with HTML, CSS, and JavaScript on client and internal products.

SKILLS

Programming Languages/Technologies: HTML, JavaScript (ES6+), TypeScript, React.js, Next.js, Redux, Supabase, Node.js and REST APIs

Frontend Frameworks & UI Libraries: CSS, Material-UI, Tailwind, and Emotion styled components

3D & Avatar Development: Avaturn, Three.js and React Three Fiber, real-time rendering, WebSockets for live updates

Workflow Management & Build Tools: Monorepo, Turborepo, pnpm, ESLint, Husky and shared SDK development with autogenerated types

Version Control: Git, GitHub and Bitbucket

Operating Systems: Mac, Ubuntu/Linux, Windows

Research and Development: Solving complex problems, evaluating new tools and libraries

Project Management Tools & Methodologies: Jira, Trello, Asana, Confluence, Agile, Scrum, SDLC (Software Development Life Cycle)

PROJECTS

Vasana vasana.ai 10/2025 – 08/2026

React.js, TypeScript (Frontend Developer)

- Vasana advances mental and behavioural health through behavioural diagnostics, creating adaptive applications and therapeutics that help individuals flourish.
- Contributed to the development and implementation of the diagnostic tools, ensuring they are both effective and accessible.

The Pixele Studio 05/2025 – 11/2025

Next.js, TypeScript (Frontend Developer)

- Developed frontend features for an AI-powered photo-to-talking-video platform using Next.js. Implemented UI for text/audio-based lip-sync, templates, and media preview workflows. Supported multiple export formats including MP4, GIF, JPG, and PNG.
- Optimized performance and ensured a fast, responsive, and user-friendly experience. Collaborated with designers and backend teams to deliver scalable and production-ready features.

Shrunk 3D shrunk3d.com 05/2023 – 05/2025

React.js (Admin site), Next.js (Marketing site), Three.js

- As a Frontend Developer for Shrunk 3D, designed and implemented key e-commerce features, including purchasing 3D replicas, handling payment processes, and managing user orders. Used Next.js to build a dynamic, SEO-optimized marketing platform, and React.js for an interactive admin site for order management, franchise oversight, and inventory tracking.
- Integrated Three.js to display 3D models, giving users an immersive view of their custom 3D replicas. Also developed a desktop application using React.js and Node.js for franchise management, allowing franchises to manage orders and capture 360-degree photos of customers that were used to create personalized 3D models.

Multiple Client & Internal Projects 02/2023 – 10/2025

Frontend Development & Feature Enhancements (React.js / Next.js)

- Contributed to multiple client and internal projects such as Fintwit (AI-based stock market platform; fintwit.ai), Transport Match (vehicle transport admin panel), and My Crush AI (AI companion web app).
- Developed and enhanced frontend features, improved UI/UX, fixed bugs, and optimized performance using React.js and related libraries.
- Collaborated with cross-functional teams and supported continuous development aligned with evolving client requirements.

EDUCATION

Bachelor's in Computer Application 2020 – 2023

Gujarat University Ahmedabad

High Secondary School 03/2020

Nalanda Vidhyalaya 2 Surat
